

Year 11 into 12 Summer Work – Core Maths

There are FREE (at the time of writing) virtual courses that you might want to attend. These are known as MOOCs (Massive Open Online Courses) and you will hear a lot about these through your tutor activities in Sixth Form. Here you will find a link to the [Open University free courses](#).

For those students considering Core Maths try filtering the Open University courses to ‘Mathematics & Statistics’ and also filter the level to ‘Level 1 introductory’.
